

FISHES CHAINED – BLOCKCHAIN REVOLUTION

How it works

BLOCKCHAIN

Blockchain is a mutable distributed ledger technology contains nodes. These nodes are mirrored and distributed, thus called Distributed Ledger Technology

SUPPLYCHAIN TRACEABILITY

A system of documents intended to trace a product's movement across the manufacturing process. These data are then saved as nodes in blockchain.

SMART CONTRACT

A computer program that automatically execute, control or document legally relevant events and actions according to the terms of a contract or an agreement

Sensors transmit data

Realtime location

A screenshot of a web application interface for a supply chain system. It features a 'SUPPLY CHAIN' title, a login form with fields for 'Username' and 'Password', and a 'LOGIN' button. To the right, there is a registration form with fields for 'Password', 'Confirm Password', 'Contact Number', and 'Location', along with a 'Create Account' button. The interface is displayed on a smartphone screen.
